June 2019

What is CRConnect?

- Clinical Research Connect (CRConnect) is a workflow system developed by the SOM Deans Office to assist staff with the study start-up process.

- It outlines all of the compliance requirements (IRB, Grants & Contracts, Investigational Pharmacy, InfoSec, HIRE, etc) and collects the required documents.

- Web-based application that will be required for all IRB-HSR submissions.

UNIVERSITY of VIRGINIA

CRConnect

CRConnect Benefits

- Collaboration with the study team

- Access most updated information/ documents

- Specific, protocol related compliance requirements can be seen

- Interface/ communication with the IRB-HSR and other regulatory authorities (HIRE, InfoSec, IDS, etc)

- Single Submission/Tracking # for IRB-HSR

CRConnect Benefits

- Automatically generates forms and documents

- Uses DocuSign for electronic signature (by PI and Dept Chair)

- Email notifications regarding status of various steps

- Study team and other regulatory groups (IDS, InfoSec, etc) can access current documents

- Able to see the current status of all submissions to regulatory teams

UNIVERSITY *of* VIRGINIA

Rollout Plan

- Implementation groups identified by Steering Committee

- Groups contacted to provide specific department contact information

- Training for all users by the CRConnect Support team

- Once trained, users will be granted access and all future submissions to IRB-HSR are required to be through CRConnect

- Roll-out complete by December 2019
