## PROCEDURES

- Clinical Research Coordinator
  1. For each study, create a series of file folders or start a binder for documents collected during the study (Refer to Attachment: Regulatory Files Content). Use sponsor format if applicable and if provided.
  2. Maintain and update the file folders or binder as necessary, adding appropriate documents as they are generated or received.
  3. If study is sponsored, identify with sponsor which documents they require to be sent to them. Determine which documents sent to the sponsor must be original and which can be copies.
  4. Retain copies of all original and revised documents (e.g., protocol, investigator's brochure, informed consent form, IRB approval, correspondence).

5. Retain copies of all documents/submissions/correspondence sent during study (e.g. to IRB, to sponsor).
6. Ensure that subject records and regulatory files are kept confidential and are stored in a secure, limited-access location.
7. Prior to visits scheduled by monitors and auditors, review content of regulatory files and subject records for completeness.
